## PROJECTS

#### Company Website [Link](#)

Designed and developed the official company website from scratch using Figma for design and Wix Studio for development.

- Created responsive layouts and customized UI components, aligning with brand identity.
- Worked closely with the backend team to integrate dynamic content and features.
- Collaborated using Jira, Confluence, and Zoho Learn for task tracking, documentation, and workflow coordination.

## Analytics Platform (In Progress)

Technologies: Angular, FlutterFlow, Tailwind CSS, Ng-Zorro, Storybook, D3.js, ECharts, Figma, NodeRed

- Use Figma For Designing.
- Use Zoho Learn, Google Docs, Confluence, and Jira For the Project Management and Documentation
- Currently developing a business analytics. A platform that helps organizations analyze data and extract insights through interactive dashboards, charts, and graphs
- Building the web application with Angular, styled using Tailwind CSS, and enhanced with Ng-Zorro UI components for a professional user experience.
- Using Storybook for UI components development and documentation to ensure consistency and reusability.
- Using D3.js, Echarts for charts, and NetworkUi
- Designing a FlutterFlow-based companion app to provide mobile and web access to analytics dashboards.
